

The perfect packaging

A gift basket for Kärntnermilch from TEWA

As Austria's quantitatively smallest corrugated cardboard specialist, Feldkirchen based family business TEWA Corrugated Cardboard Company Ltd., has made its mark especially as a niche player. Customised packaging solutions are given priority. The company's own development department is concerned with the construction of extraordinary products, from pizza boxes to furniture made of corrugated cardboard. For instance, a gift basket made of cardboard was developed and produced exclusively for Kärntnermilch. This expertise is in demand not only in Austria, but also in Croatia, Slovenia, Hungary and Germany. TEWA has consequently advanced technological innovations for the past years. A new planning software, allowing customers to view the yet to be constructed packaging in 3D, has been put to use, logistics have been improved thanks to a driverless transport system and a new manufacturing plant has been installed.

In April 2008, a new production line for corrugated cardboard processing was put into operation. The investment volume for this amounted to 1,2 million Euro. The new plant meets all requirements to quality and rate of production and TEWA takes another step forward in the direction of modernisation and further increases customer satisfaction.

Innovation and lived enthusiasm about the natural product of corrugated cardboard help TEWA to further extent their services around packaging.
